STEM

Girls One-Day STEM Challenge Event

Discover what we have to offer girls who love science, technology, engineering and math. Perform a series of stem challenges using ordinary recyclable objects, then build and program the latest Mindstorm EV3 Robots and Moss Cubelet robotic blocks. Tour the BC3 Science and Technology Department. Lunch provided. Commemorative t-shirts available. For girls in grades 7-9.

Girls Rule the World with STEM

This event will combine STEM with journaling and video production. This course allows young women to investigate careers in STEM and coding. Explore the latest trends in Robotics, programming and other STEM activities. This is a hands-on student focused opportunity to use basic programming concepts to create fun games and helpful applications. Build and program LEGO Mindstorm EV3 robots and Moss Robotic Cubelets. For girls in grades 7-9.
